

Carden Arbor View School Announces

2012 Series of Speakers for Our Community

An Evening with Dr. Georgina Lamphere

“The Adolescent Brain”

Tuesday, February 28, 2012

7:00 p.m. - 8:30 p.m.

**Location: Carden Arbor View School Library
1530 N. San Antonio Avenue, Upland, CA 91786**

Save the date! Carden Arbor View School is excited to host Dr. Georgina Lamphere as she brings her knowledge and professional expertise to talk about “The Adolescent Brain”. The teenage brain is a work in progress. During her presentation Dr. Lamphere will review changes that occur in the brain during development, and how the adolescent personality changes before the decline in grey matter and pruning of neural connections begins. Dr. Lamphere will discuss parenting strategies on how to cope with your child during adolescence as the surge of hormones at puberty tends to make teenagers more emotionally reactive, subject to greater peer influence, and prone to risky behavior.

Dr. Georgina Lamphere has been a partner in private practice with Haven Psychological Associates since 1987. As a clinical psychologist her specialty areas include families, children and adolescents. Dr. Lamphere has also worked ten years as a school psychologist for the Claremont School District, and four years as director of the inpatient adolescent program for CPC Rancho Linda Hospital in Fontana.

We are looking forward to having you join us for this informative community event!

Call today for reservations. Seating is limited.

Carden Arbor View School (909) - 982-9919

Childcare will be available.
