Summer Excitement for Students Kindergarten thru 8th Grade

Our Summer Program is designed to support the philosophy of Carden Arbor View School; to embrace the ideals of an Education with Joy, Growth, Enthusiasm, Dignity and Respect, making this program a valuable addition to your child's summer activities.

Offering a variety of enrichment and academic courses, we are committed to providing a quality program. Utilizing the Carden instructional method, in conjunction with the technology available in both the computer and science labs, the **Academic Academy** is designed to provide students with an opportunity to further develop their basic skills and challenge themselves to pursue their individual interests. During the two Academic Academy sessions, students will spend mornings in grade specific Language Arts and Math activities. Keyboarding will be offered as needed. Afternoons will find 1st through 8th graders in combined activities with identified themes. (Please see the Summer Session Themes below.)

Kindergarten is a self-contained program. Throughout the entire day (9:00 a.m. - 3:00 p.m.) Math, Reading and/or Pre-Reading skills will be incorporated into the theme for the week. Day trips will be included as they apply to some of the summer themes.

Summer Program 2009
